PICKETT'S OHIO GROWN FRUIT TREES

For more than ninety years we have given special attention to Fruit Trees, growing them with utmost care and skill in our own large Nurseries. Pickett's trees are good trees and are sold at reasonable prices. We propagate our Fruits under careful conditions, selecting buds from bearing trees of outstanding merits. This is your assurance that our trees are pure and of the best strains.

Well cared for in the Nursery, the trees are thrifty and well-rooted. We dig them carefully, running the digger very deep so that you get all the feeding and fibrous roots and you know the trees can grow.

The farmer and gardener who has bearing Fruit Trees makes money. Plant some trees this year and every year.

The laws of nature make trees bear better in groups, so plant more than one variety of each fruit so they may cross pollinate.

Number of Trees or Plants for an acre of Ground Set at Regular Distance Apart

Feet		Feet	
1 by 1.....	43560	5 by 5.....	1742
2 by 1.....	21780	6 by 6.....	1210

Rule: Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant or hill; which divided into the number of feet in an acre (43560) will give the number of trees to an acre.

APPLE

Our trees grow rapidly, bear young and produce heavily. A careful selection of varieties will give you superior fruit all summer, fall and winter.

TAXUS

Taxus, commonly called Yew, has long been a favorite of English Gardens. It has a traditional elegance that adapts it admirably to hedge, specimen, and foundation planting. The rich green color, lacy texture of its foliage, its hardiness in our climate, and adaptability to any situation, make it one of our finest evergreens.
